

## FREQUENTLY ASKED QUESTIONS FOR KMY-2012

Q.1. Why are applicants required to submit medical test results with their application forms when only the reports and results of medical examinations, subsequently conducted on selected yatris at the Delhi Heart and Lung Institute and the ITBP Base Hospital in Delhi in May 2012 onwards, will be considered valid? Where should applicants get medically examined to obtain such initial medical reports/results to be submitted with the application forms?

Ans. Given the extremely arduous nature of the Yatra, only those who are physically fit and healthy should apply to undertake the Yatra. The above mentioned initial medical examinations/results are mainly intended for applicants to judge their fitness before they decide to apply for the Yatra. The results of these initial medical examinations, carried out at any competent health centres of the choice of applicants, will be acceptable to process application forms in the Ministry of External Affairs.

However, the selected yatris will be required to undergo and qualify comprehensive medical examinations, conducted at the Delhi Heart and Lung Institute and the ITBP Base Hospital in New Delhi in May 2012 onwards, before they are allowed to undertake the Yatra proper.
